

# COMPOSITION OF A NATURE RESEARCH PAPER

## PRINT PAPER

### Key features:

- Includes main text and figures/tables/boxes plus references.
- Appears in print and online as a PDF and as full-text HTML.
- Text and figures are copy-edited to *Nature* style.
- Figure formats: colour artwork supplied in **RGB (recommended) or CMYK formats**; preferred formats are layered Photoshop (PSD) or TIFF for photographic images (minimum 300 p.p.i.), AI, Postscript, Vector EPS or PDF for line drawings and graphs.

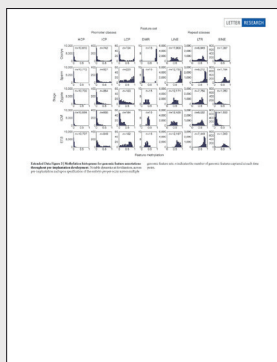

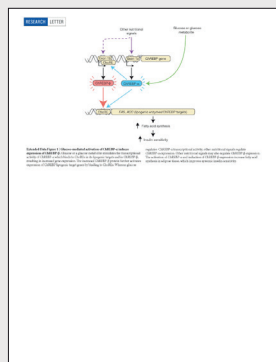

## METHODS

### Key features:

- Includes full Methods and associated references (if additional to the main references). Figures and tables are not allowed.
- Online only, appended to the print paper PDF and in the HTML.
- Text and any additional references are copy-edited to *Nature* style.

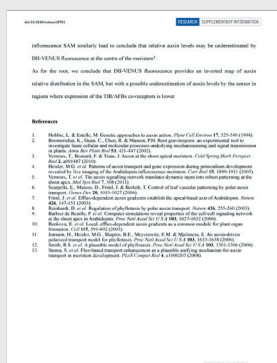

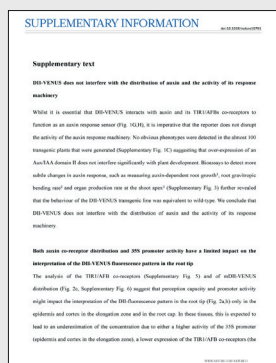

## EXTENDED DATA

### Key features:

- Includes up to ten additional Extended Data display items (figures or tables plus legends, each not exceeding a page). Any additional references are included after the Methods section.
- Online only, appended to the print paper PDF (after the Methods), and included in the HTML.
- Legends are copy-edited but figures and table bodies are not edited and are used as submitted.

## SUPPLEMENTARY INFORMATION

### Key features:

- Most Supplementary Information is supplied as a single PDF and may include supplementary discussion, notes, methods, etc. Figures should not be included in the Supplementary Information. Additional file formats include movies, spreadsheets and data sets.
- Online-only, downloaded as a separate file(s) from the Nature website.
- Discrete items of Supplementary Information (e.g. movies) must be referred to at an appropriate point in the main text of the paper.
- Not copy-edited, but PDFs are labelled with a *Nature* header/footer.
